

TRAIT DISTILLED™. THE FIRST PATENT PENDING WATER SOLUBLE CANNABINOID EXTRACT.

The breakthrough

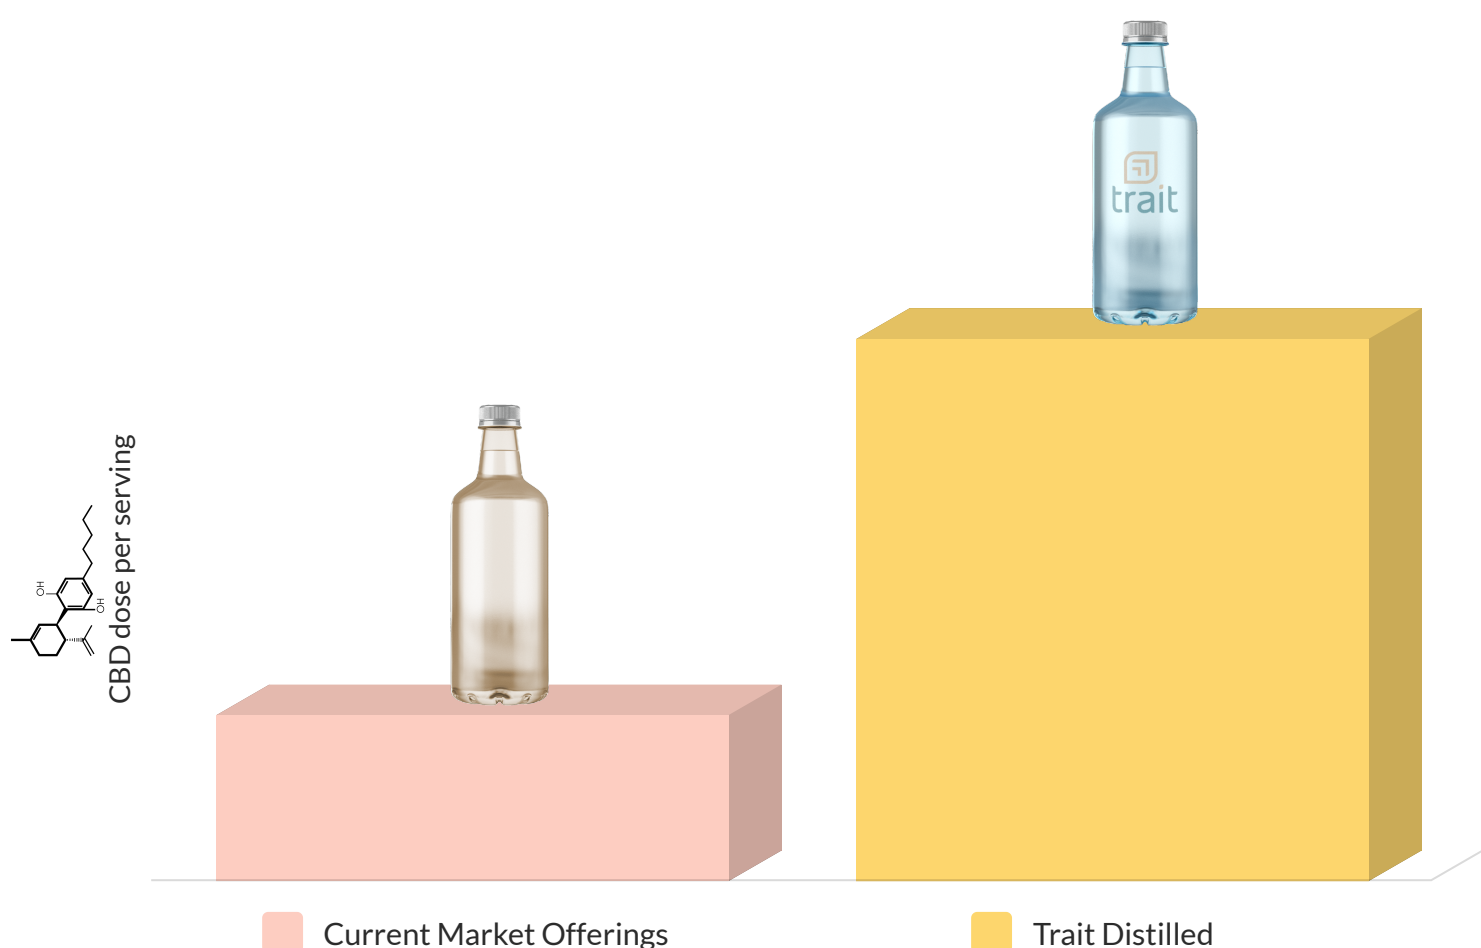

Water-soluble CBD is a technologic breakthrough Trait Biosciences has been working on for years. A clear and odor-free extract that can easily be added to consumer products, nutraceuticals, and future medicines is a game changer on multiple levels.

By using water-soluble cannabinoids, Trait's patent pending formula solves some key challenges producers of CBD products have been facing for years. The benefits include:

Trait Distilled's water soluble properties allows for a higher dosage of CBD per serving

A Comparison of Oil-Soluble vs. Water-Soluble CBD

Hemp oil
extract in water,
20 mg/serving CBD

Hemp oil
extract in emulsion,
20 mg/serving CBD

TRAIT Distilled:
20 mg/serving CBD
Trait formulation in water

The breakthrough involved more than two years of research by more than 40 scientists and researchers at the company's facility in Los Alamos, New Mexico. The water-soluble cannabinoids are now available in the form of a clear liquid and powder — either of which can be blended into the water and are ideal for the development of premier quality cannabinoid-infused beverages and edible products.
